REVERSIBLE CAM-RISE HINGES

- Industry standard self-closing cam-rise hinges
- Door opens with minimum effort
- Strong self-lubricating nylon cam delivers smooth, trouble-free door operation
- Cam-rise action reduces gasket wear, even with irregular floors
- Holds door open beyond 130°
- Doors lift off without disassembly or removing hinges
- Simple manual operation reverses hinges for use on right or left-opening door

SPECIFICATIONS

MATERIAL:
High pressure die-cast zinc with self-lubricating nylon cam

FINISH:
See table on pg. B-42. Powder coated finishes available for severe environmental applications

OFFSETS:
See table on pg. B-40

MOUNTING:
Drilled and countersunk for 1/4" (6.0mm) flat head screws

LOAD RATING:
See Hinge Selector Chart, Page B24, Group D

1245

PACKAGING:
6 each per carton

WEIGHT:
Approx. 18 lb. (8.2kg) per carton

1246

PACKAGING:
6 each per carton.

WEIGHT:
Approx. 12 lb. (5.4kg) per carton

KASON REVERSIBLE CAM-RISE HINGES

REVERSE HINGES IN MINUTES

1. Lift strap from flange and remove pin assembly.

2. Pop out cap. Turn strap 180°, reinsert pin assembly in strap.

3. Reposition strap into flange and replace cap.

ITEM # 1243 LOWER

1243 REVERSIBLE OBLIQUE HINGE

The 1243 is an oblique lower hinge, designed to be used in conjunction with the 1245 flush upper hinge to provide increased lift and potential energy for greater closing force than normal cam lift hinges.

- Precision engineered for spring action without the costly spring.
- Closing force rivals any spring-assisted hinge.
- Lowered cam load extends life of internal parts compared to spring-assisted hinges.
- Oblique design gives doors steeper rise for less sweeper gasket drag and wear.
- Built-in dwell holds door open beyond 130°.
- Doors lift off without disassembly or removing hinges.
- Simple manual operation reverses hinges for use on right- or left-opening door.
- Mounts as standard cam-rise hinge.
- **1243 must be paired with 1245 flush to achieve oblique action.**
